DETAILED ACTION

Remarks

1. The Amendment filed on 27-March-2006 has been received and entered. Claims 2-3, 10-11, 19, and 21 have been cancelled. Therefore, claims 1, 4-9, 12-17, 20, and 22 are pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John R. Kasha (Attorney of Record) on April 12, 2006.

Amendments to the Claims:

3. The claims has been amended as follows:

Replace claim 1 with the following:

Claim 1 (Currently Amended): A method for providing media samples within search engine results pages, comprising:

receiving a search request comprising a keyword;

searching a first database comprising unsponsored websites for information pertaining to the keyword;

searching a second database comprising media server links for music-related information pertaining to the keyword,

wherein the media server links of the second database comprise one or more of a first link to an identified media sample on a media framework and a second link to a media product on an Internet retailer,

wherein the media product comprises the identified media sample,

wherein if the keyword matches information pertaining to an unsponsored website that is in the first database the search engine places a third link to the unsponsored website on a results page; and

wherein if the keyword matches information pertaining to music-related server links that is in the second database the search engine places one or more of the first link and the second link on the results page:

in response to a selection of the first link on the results page, providing the identified media sample from the media framework to enable playback on a media device, and

downloading the identified media sample from the media framework through a branded player to enable playback of the identified media sample when the identified media sample is associated with a the branded player,

wherein the request further includes a client-ID that identifies the branded player that should be launched to playback the identified media sample, and wherein the branded player enables a consumer to listen to the playback of the identified media sample and purchase the media product, while reviewing and accessing other search results and related information.

Replace claim 4 with the following:

Claim 4 (Currently Amended): The method of claim 3 1, wherein a consumer is enabled to access other search results during playback of the identified media sample.

Replace claim 7 with the following:

Claim 7 (Currently Amended): The method of claim 6, wherein the branded player provides a fourth link to a consumer to purchase media that corresponds to the identified media sample.

Replace claim 12 with the following:

Claim 12 (Currently Amended): The method of claim ~~4~~ 8, wherein a consumer is enabled to access other search results during playback of the media sample.

Replace claim 15 with the following:

Claim 15 (Currently Amended): The method of claim 6, wherein the branded player provides a fourth link to a consumer to purchase media that corresponds to the media sample.

Replace claim 20 with the following:

Claim 20 (Currently Amended): A system for providing media samples within search engine results pages, comprising:

a plurality of internet-connected consumer devices for transmitting search requests online, the consumer devices including media players;

a search engine for receiving consumer search requests from the consumer devices, wherein the search engine receives a search request from one of the consumer devices, wherein the search request comprises a keyword, and wherein the search engine searches a first database comprising unsponsored websites for information pertaining to the keyword and a second database comprising media server links for music-related information pertaining to the keyword;

a media framework for retrieving the identified media sample and for providing the identified media sample to the consumer device for automatic playback on a media player associated with the consumer device; and

an Internet retailer for purchasing a media product comprising the identified media sample,

wherein the media server links of the second database comprise one or more a first link to the identified media sample on the media framework and a second link to the media product on the Internet retailer,

wherein if the keyword matches information pertaining to an unsponsored website that is in the first database the search engine places a third link to the unsponsored website on a results page of the search engine,

wherein if the keyword matches information pertaining to music-related server links that is in the second database the search engine places one or more of the first link and the second link on the results page of the search engine, and

wherein the consumer search request includes a client ID that identifies the branded player that should be launched to playback the identified media sample, and wherein according to the client ID, the media framework further downloads a the branded player that is associated
